

Data-Driven Organizations SNI Program

Background

The California Health Care Safety Net Institute (SNI) is working with Point B to implement the Data-Driven Organizations Program for the county California PHS.

Program Outcome

By participating in this program, participants will understand the requirements of building a data-driven culture; receive tools, coaching and in-person workshops to assist them building that culture at their organization; and work alongside peers in applying lessons from the program to build processes and capacity to support waiver-related reporting.

Program Overview

Audience

- A team of three people per organization, including Clinical Quality and/or Performance Improvement lead
- Has authority or directly reports to leader with authority to implement data governance program and related activities
- Can be either IT or business but focus should be on the use of data not necessarily the provision of it
- Have some passion around data/metrics

About Point B

[Point B](#) helps clients manage one of their most important assets: their information. As care delivery models evolve to improve outcomes, so must information flow and data use. [Our services](#) include building a framework to lead the transition to an information-driven organization with governed processes.
