

# ***Epic*** Safety Net User Group (eSNUG) Video Visit Integration

---

Tuesday, August 18, 2020  
1-2pm

[Recording Link](#)

# Agenda

---

Topic	Lead(s)
<b>Welcome, Logistics &amp; Intros</b>	David Lown Zoe So
<b>Santa Clara Presentation: Video Visit Integration with Cerner</b>	County of Santa Clara Health System
<b>Q&amp;A and Peer Sharing</b>	All
<b>Wrap-up &amp; Announcements</b> <ul style="list-style-type: none"><li>• SNI Updates</li></ul>	David

# Logistics

---

You're encouraged, but not mandated, to go on video!

Please mute yourself! (We'll have to mute lines if there is background noise)

Please feel free to speak up or chat in any questions

Webinar will be recorded and saved on [SNI Link/Data/EHR User Groups](#)

Please complete our post-event survey (posted in the chat)

# Epic Safety Net User Group (eSNUG): Video Visit Integration

---

August 18, 2020

# INTEGRATED VIDEO VISITS

COUNTY OF SANTA CLARA  
**Health System**

# Who are we?

Michael Hwa,  
MD FACP

EPIC Program  
Manager

Dan Vostrejs,  
MD MHS FAAP

Ambulatory EPIC  
Champion

**3 HOSPITALS**  
**1025 BEDS**

**13 CLINICS**  
**>970K OUTPATIENT VISITS**

**>1000 PHYSICIANS**  
**>700K PATIENTS**

**O'CONNOR HOSPITAL**  
A COMMUNITY HOSPITAL

**SANTA CLARA  
VALLEY MEDICAL CENTER**  
Hospital & Clinics

**ST. LOUISE  
REGIONAL HOSPITAL**  
A COMMUNITY HOSPITAL

# Some Definitions

- **Vidyo = Video Conferencing Company**
- **HealthLink = CSCHS name for EPIC EMR**
- **MyHealth Online = CSCHS name for EPIC MyChart**
- **All speakers have no conflict of interest**

# Roadmap

- **Our journey to video visits**
- **Technical aspects of Vidyo and EPIC integration**
- **Workflows**
- **Challenges and opportunities**
- **Discussion**

# JOURNEY TO INTEGRATED VIDEO VISITS

JESUS SAUCEDO, MD MBA

# Pre-COVID-19

- CSCHS was at the late planning stages of rolling out a telehealth solution
- There was little to no hardware deployed (e.g. phones, tablets or webcams) to support video visits.
- Initial plan was for a gradual rollout to various specialty areas with specific needs for a telehealth solution

# Initial Pre Covid-19 Rollout

- **Rehab Center** – Discharged spinal-cord injury patient consultations using video, meet the needs of frequent healthcare to decrease complications and ER visits
- **Custody** - Ability to schedule follow-up video visits with patients within jails: specifically, from each of the four jail clinics, and from the medical examination rooms scattered around jail residences to providers in specialty clinics at SCVMC
- **BHS and BHS custody** – Ability to consult providers who are in custody facilities and outside with SCVMC
- **Tele Stroke** - Ability to consult out into the field with paramedics. Consultation between ambulances and the stroke neurologist at SCVMC to determine best disposition for suspected stroke patients and prepare teams at SCVMC for in-coming stroke patients.
- **Homeless Health and Residential** – Ability to remotely consult with homeless clinics with SCVMC

SHELTER IN  
PLACE ORDER

3/16/2020

# COVID-19 Rollout

- **Ambulatory Primary Care**
  - Adult and Primary Care
  - Family Medicine
  - OB/GYN
  - Urgent Care
  - Non-specialty Behavioral Health and Dental
- **Ambulatory Specialty Care**
  - Adult and Pediatric Specialties
  - PACE, ID, TB, Refugee
- Roll out due both access patients & demand from video solution, its improved quality over phone calls

Rapid Shift to  
Telephone  
Visits in  
Primary and  
Specialty  
Care

# Why Vidyo® ?

- To serve the needs of our providers and patients, we needed to be able to run video visits from IOS, Android, Web, and from Hyperspace workstations.
- We looked at nine technology video vendors that support video visits
- Four vendors supported video visits that integrated into Epic
- One video vendor supported Hyperspace to Hyperspace and Hyperspace to Mobile Device

Vendor	Video Visits	Integrate EPIC	Hyperspace to Hyperspace	Hyperspace to Mobile Device
Vidyo	X	X	X	X
Cisco VSM	X	X		
Adobe	X	X		
Axis	X	X		
Zoom	X			
Polycom	X			
Skype	X			
Logmein	X			
Chiro	X			

# Integrated Video Visits: Technical Considerations

Molly Forbes

# Epic Integration

Selected vendor due to compatibility and integration with Epic EMR and Patient portal

Implementing on the cusp of development transition from “deep integration” to “context aware linking (CAL)” integration framework

Selected CAL due to vendor recommendations as one of the first Vidyo/Epic CAL implementations

# Capabilities

## Types of Visits

**Provider to Patient Scheduled Visits**

**Provider to Provider Scheduled Visits (Clinic-to-clinic)**

**On Demand**

**Acute Teleconsults (Inpatient and ED)**

## Mobile and Desktop compatible

**Desktop: MyChart and Hyperspace**

**Mobile: Haiku, Canto, Rover, and MyChart Mobile**

# Implementation

**Timeline: ~6 months  
(on the longer side  
due to delays with  
integration method  
transition and waiting  
on vendor  
development)**

**Scope: Planned for  
focused pilots, but  
ultimately went big  
bang due to necessity**

**Cost: Per visit or per  
lines licensing, varies  
widely**

## **Resources:**

### **Epic team:**

- Ambulatory, MyChart, Cadence Scheduling
- Inpatient or Emergency Dept depending on scope
- Technical- Interconnect team
- Training

### **Stakeholders and SMEs**

### **Executive Sponsorship**

### **Field Support**

### **Compliance**

### **Security**

### **Project Manager**

# Features to consider

## Patient Experience

- Patient portal integration- pros and cons
- Ease of use and assistance required
- Testing mode to test setup ahead of time
- Familiarity with third party app
- Waiting room feature

## Both

- Mobile and Desktop compatibility
- Necessity of downloading a separate app
  - “Web RTC” and Mobile “Web RTC”
- Interpreter workflow support and integration with third party translation services providers

## Staff Experience

- EMR integration
  - Schedule management
  - In-line/side by side documentation
  - Integrated notification that patient joined visit
- Ease of use/Amount of patient technical support required
- Integration with peripheral hardware (stethoscopes, thermometers, etc.)

# INTEGRATED VIDEO VISITS: WORKFLOW

DAN VOSTREJS, MD MHS FAAP

## Simple

### **Integrated into existing workflows**

HSRs are already doing reminder calls the day before the visit

MA/LVN are used to “Rooming” patients

### **Staff prepare patient in advance of video visit – 3 touch points (saves time, keeps clinic moving)**

At scheduling

During reminder call

During rooming as a failsafe

### **If staff is unable to prepare patient, they can do a warm handoff to the Support Desk for more assistance**

# Goals of workflow

# Clinic workflow for Scheduled Video Visits

<b>Provider</b>				Joins VV when staff indicates pt is ready (changes dot to green)
<b>Front desk staff</b>		REMINDER CALL: Calls patient to remind of VV, Confirms Pt is set up for VV, transfers call to Support Desk if needed		
<b>Clinic staff</b>	Sets patient up for VV or transfers call to the Support Desk		ROOMING CALL: When provider is ready, staff calls pt to join VV. Once pt has joined, staff "rooms" the pt (CC, Allergies...)	

# Keys points

Prepare patient for video visit in advance

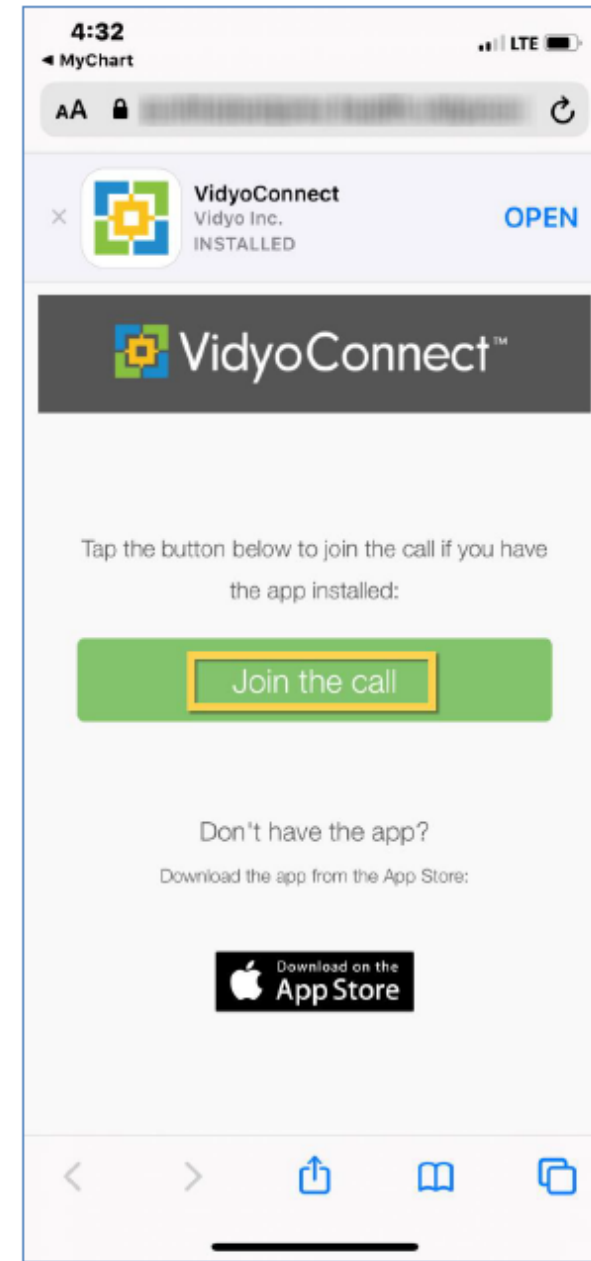

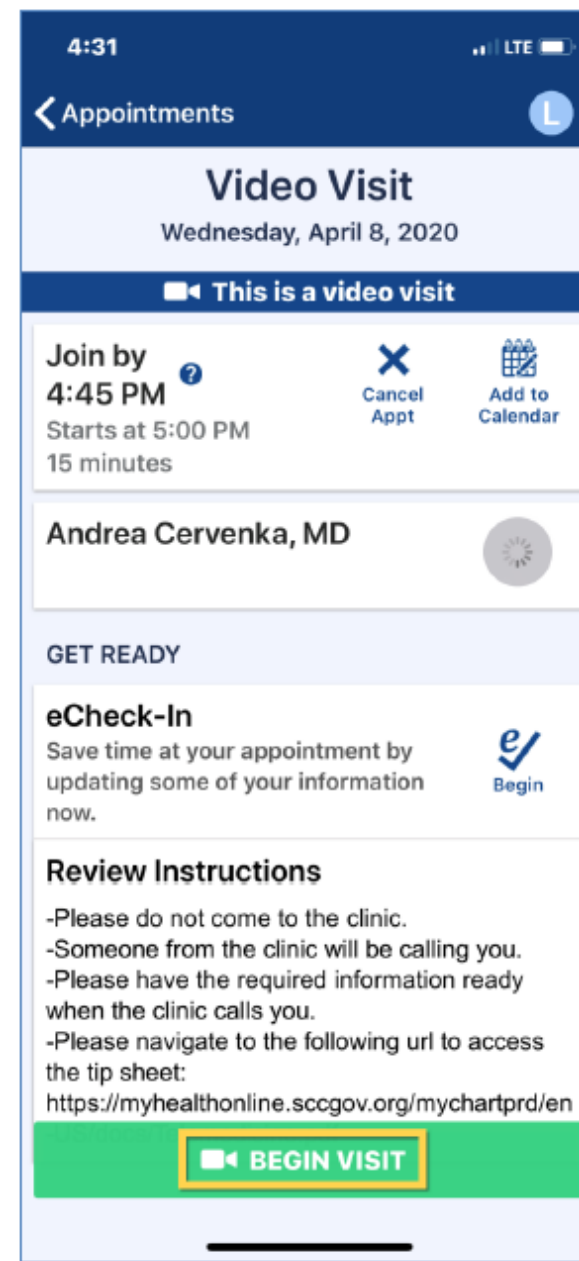

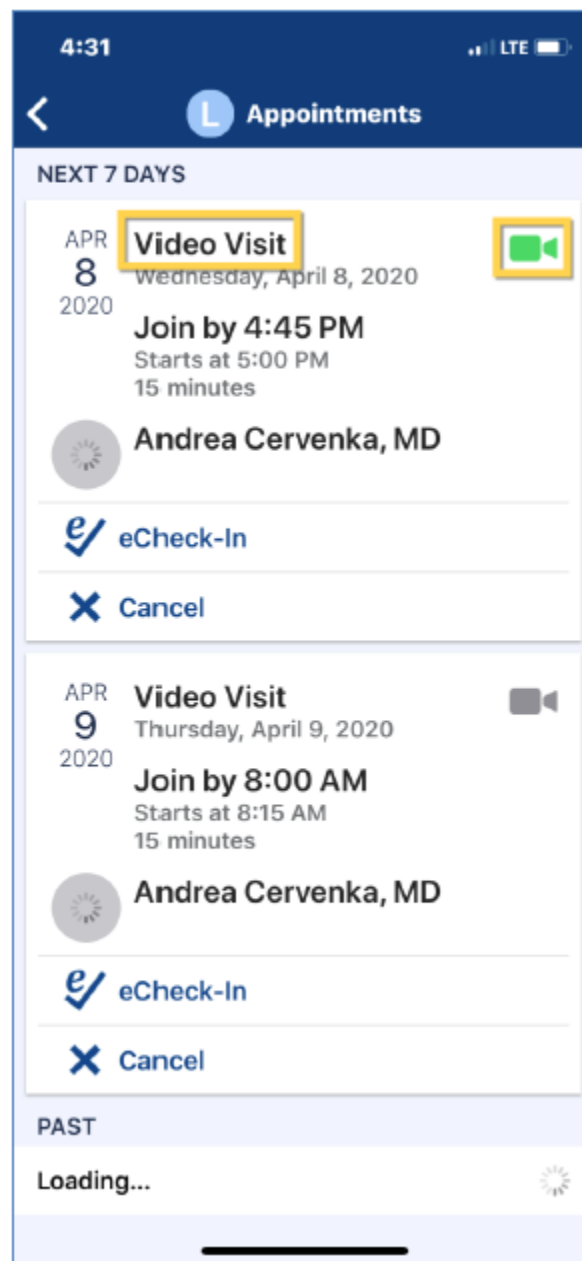

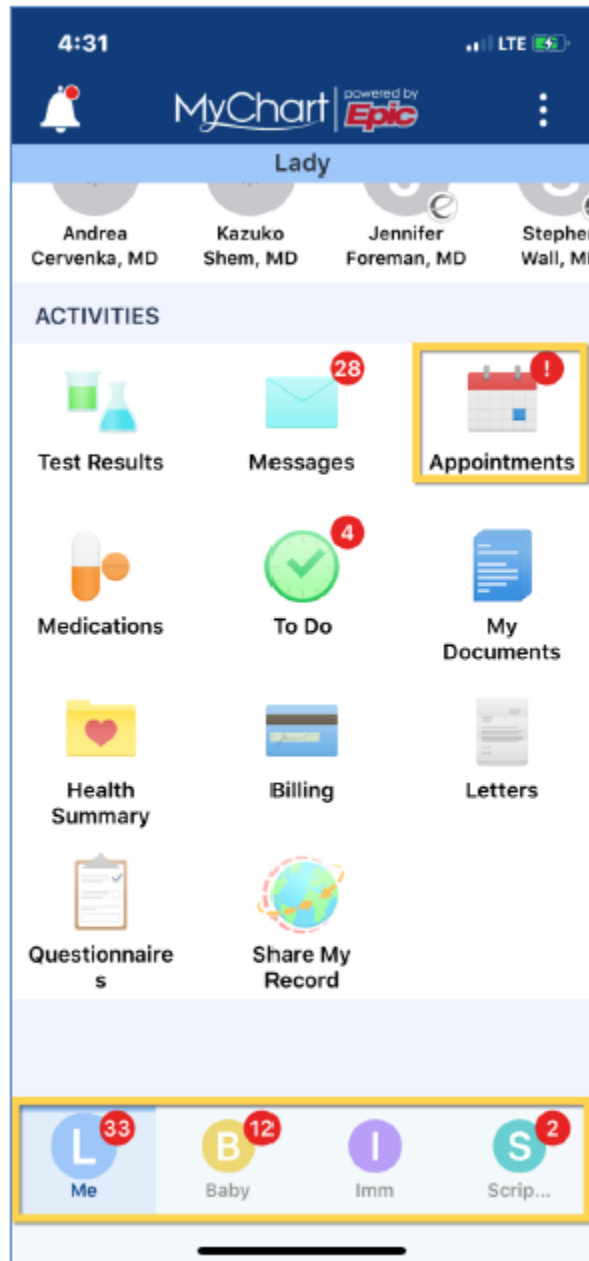

Train front desk and back office staff on how to enroll patients in MHO and prepare them for video visits

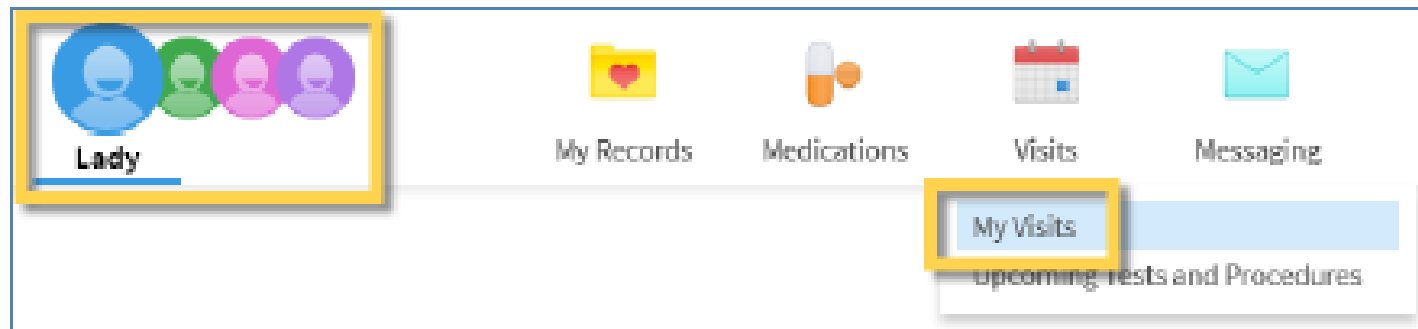

Rooming staff treats video visits like office visits—notifies patient if provider is running late, calls the patient when it is time to join the call, and “rooms” the patient.

# Patient: MyChart

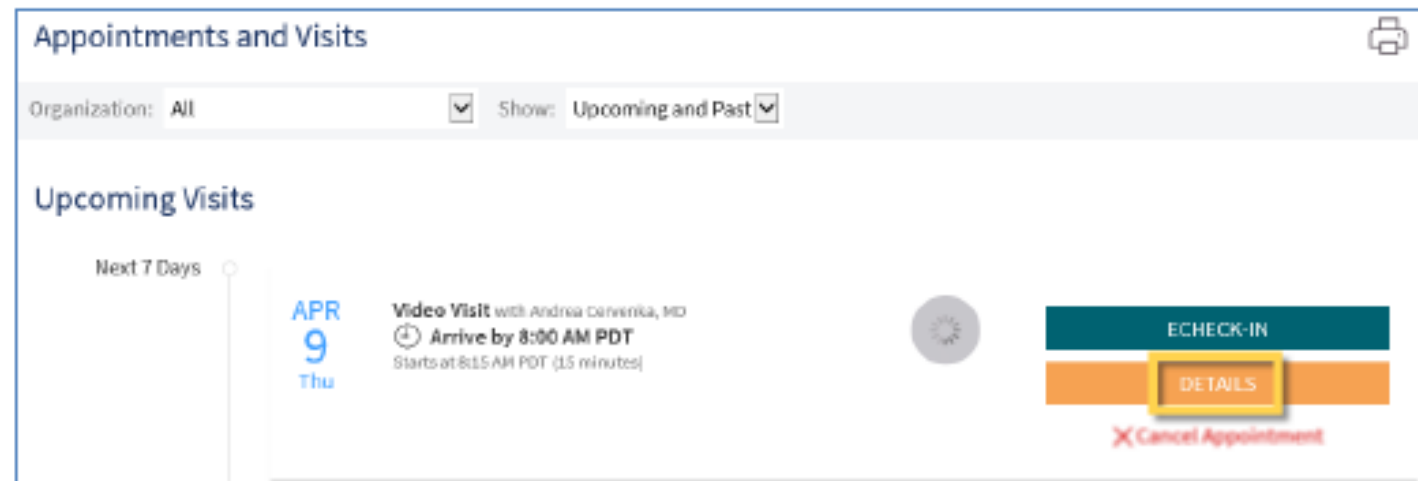

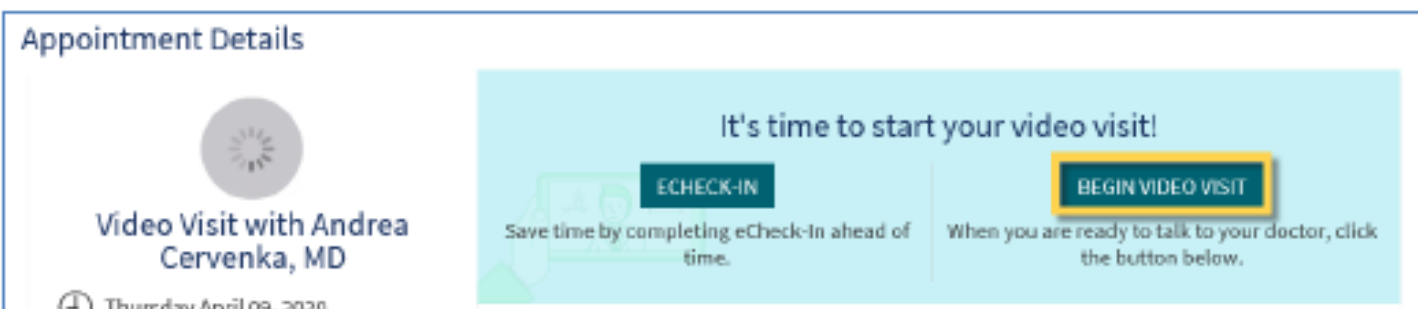

# Patient: My Health Online

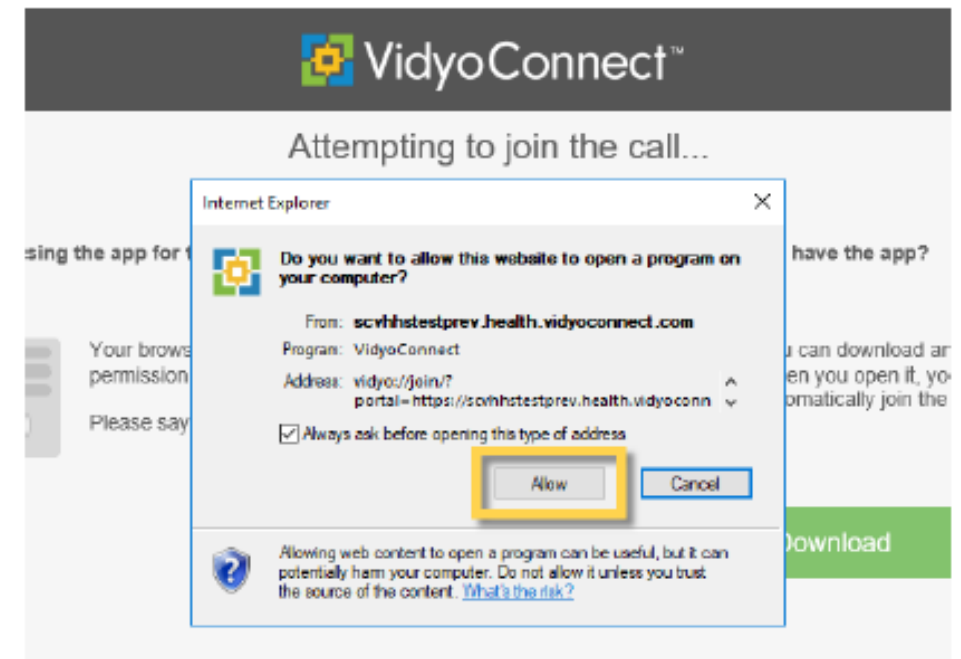

The navigation bar features a profile icon labeled "Lady" on the left, followed by five icons: a heart in a folder (My Records), a pill (Medications), a calendar (Visits), and an envelope (Messaging). Below these icons is a horizontal menu with "My Visits" highlighted in blue. A yellow box highlights the "My Visits" button and the "My Visits" menu item. Below the menu is the text "Upcoming tests and Procedures".

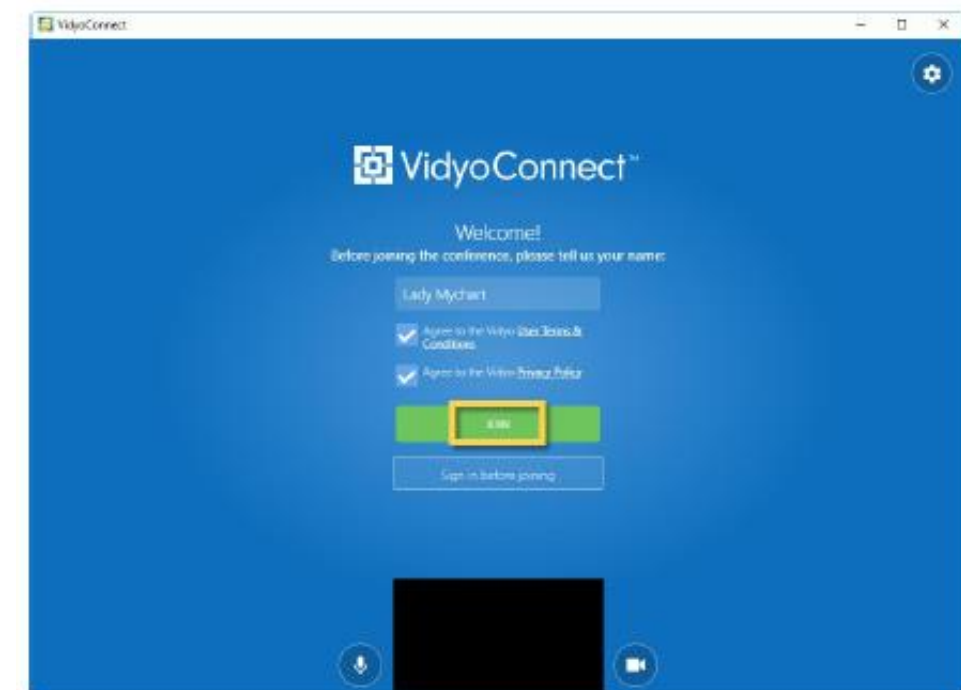

The "Appointments and Visits" section has a filter for "Organization: All" and a "Show: Upcoming and Past" dropdown. Under "Upcoming Visits", a card for "Video Visit with Andrea Cervenka, MD" is shown for "APR 9 Thu". It includes the instruction "Arrive by 8:00 AM PDT" and "Starts at 8:15 AM PDT (15 minutes)". To the right of the card is a circular loading icon. Below the card are two buttons: "ECHECK-IN" and "DETAILS" (highlighted with a yellow box). A red "X Cancel Appointment" link is at the bottom.

The "Appointment Details" section shows "Video Visit with Andrea Cervenka, MD" for "Thursday April 09, 2020". A large light blue banner contains the text "It's time to start your video visit!". Below this are two buttons: "ECHECK-IN" and "BEGIN VIDEO VISIT" (highlighted with a yellow box). The banner also includes the text "Save time by completing eCheck-In ahead of time." and "When you are ready to talk to your doctor, click the button below."

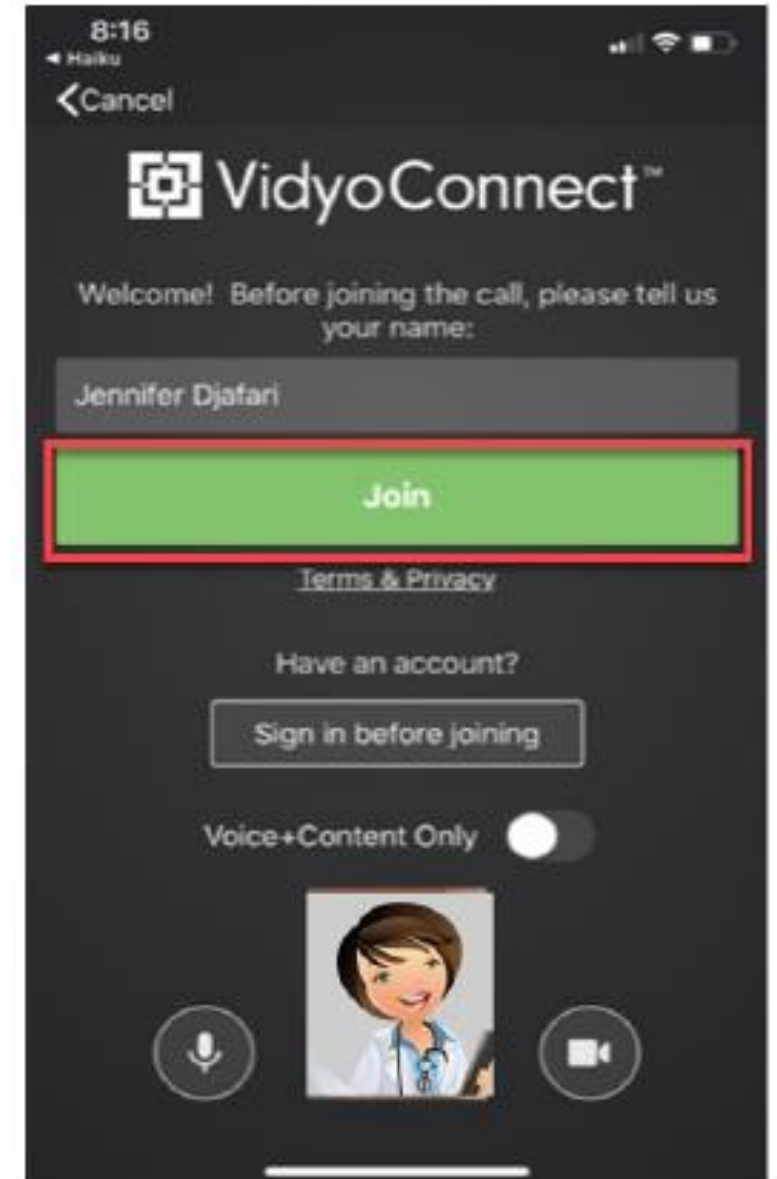

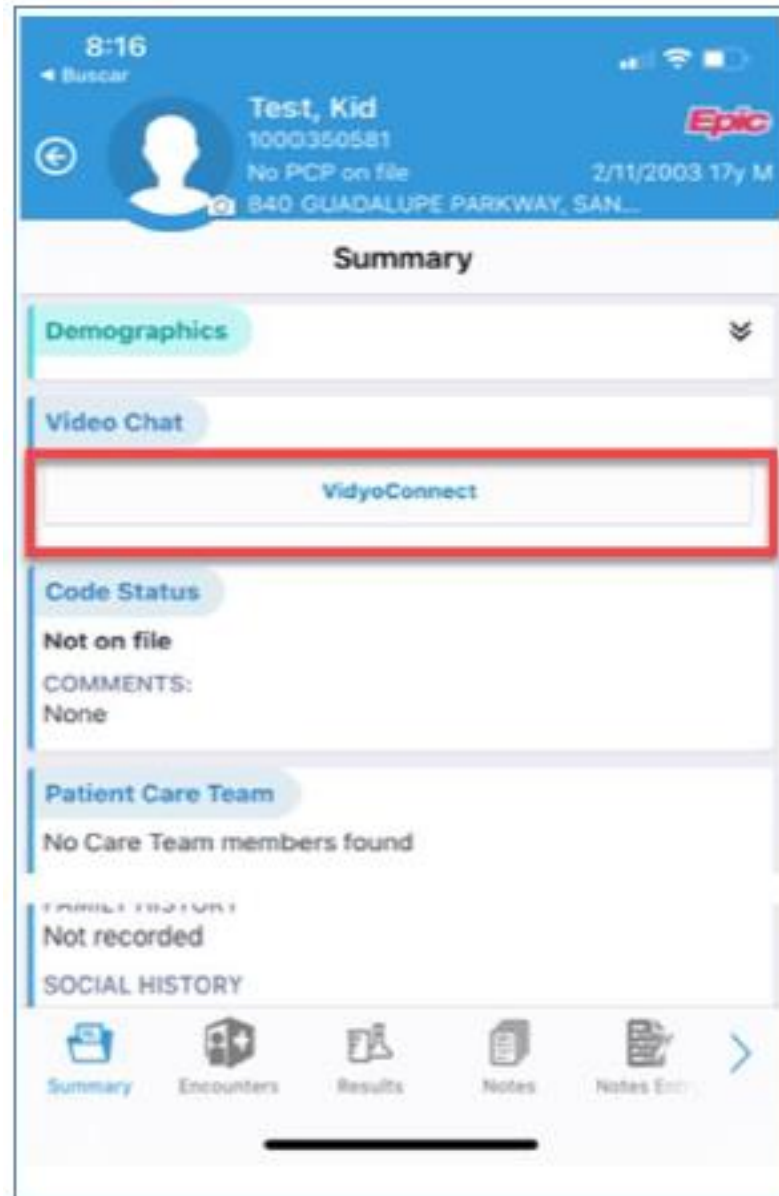

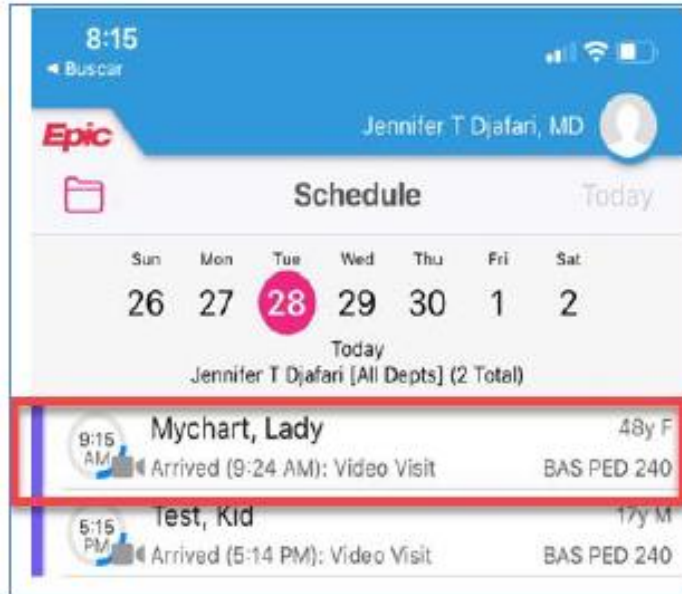

The "VidyoConnect" interface shows "Attempting to join the call...". An "Internet Explorer" security warning dialog is open, asking "Do you want to allow this website to open a program on your computer?". The dialog shows the program "VidyoConnect" and the address "vidyoconnect.com". The "Allow" button is highlighted with a yellow box. A green "Download" button is visible on the right.

The "VidyoConnect" welcome screen displays "Welcome!" and asks the user to enter their name. The name "Lady Mychart" is entered. Below the name are two checkboxes: "Agree to the Vidyo Connect Terms & Conditions" and "Agree to the Vidyo Connect Policy", both of which are checked. A green "JOIN" button is highlighted with a yellow box. Below it is a "Sign in before joining" link. At the bottom, there are icons for a microphone and a video camera.

# Provider: Haiku/Canto

# Provider: Desktop/Hyperspace

DJAFARI, JENNIFER		Filter by Status	Total: 9		
	Time ▲	Status	Patient	Video	Type
	11:15 AM	Scheduled	 5 y.o. / F		VIDEO VISIT

= Patient has not joined the VV

= Patient has joined the VV

# CHALLENGES AND OPPORTUNITIES

MICHAEL HWA, MD FACP

### **Telephone visits in many ways are more convenient than video visits**

Require less setup time, are more reliable at a lower infrastructure entry point

Significant inertia from the beginning of the pandemic to use telephone visits since that's all we had at the beginning

### **Misunderstandings about reimbursement rates between telephone and video visits**

### **Rolling out such a large improvement project across 13 clinics and hundreds of providers has been a challenge**

# Challenges: Provider

### **Lack of infrastructure**

County hardware vendor completely sold out of our standard webcam since pandemic began

### **Needing to have multiple apps (MyChart and VidyoConnect) installed for a successful visit**

### **Lack of a virtual “waiting room**

If patient joins early or provider running late, they may not know they joined correctly

## Challenges: Technology

# Challenges: Patient

## The need for an Active MyChart account

- ~43% of paneled patients, and only 20% of all patients had an active MyChart account
- Many patients require help signing up and activating accounts which can be a time intensive task

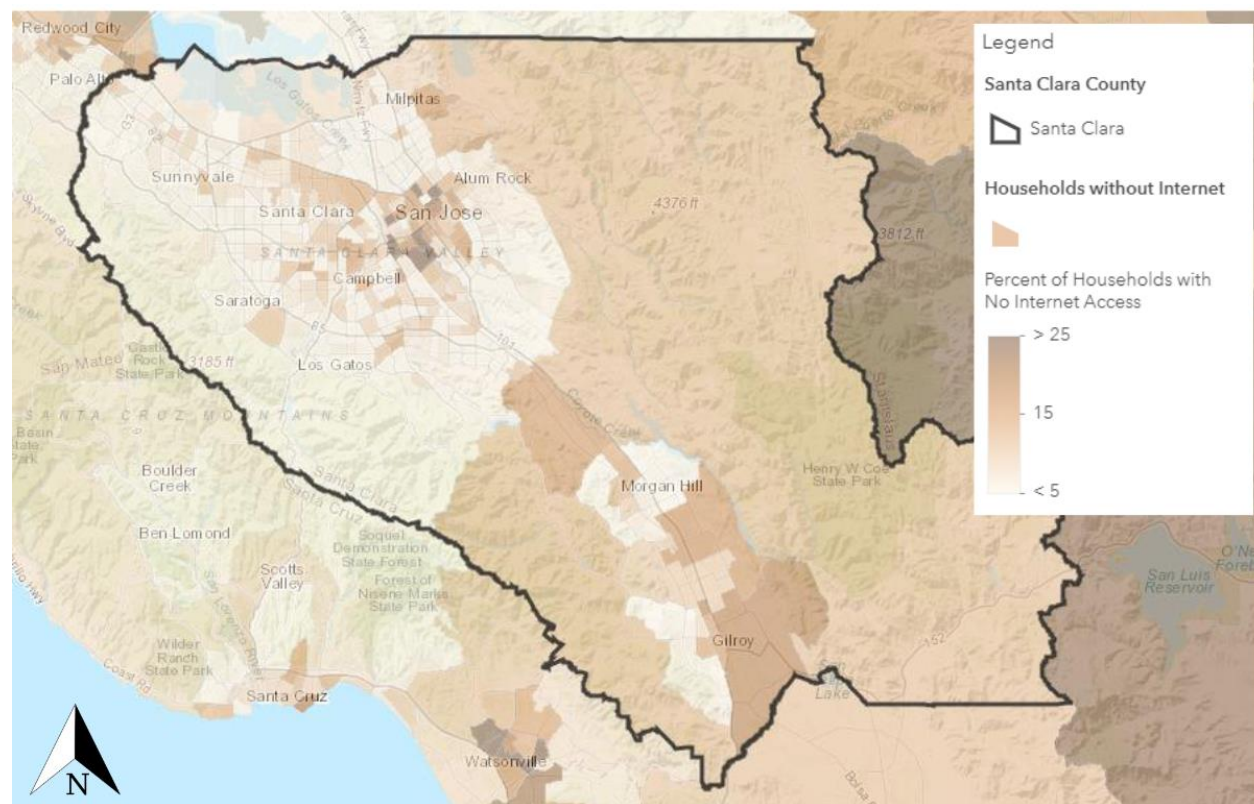

## Patient reticence to take part

- Lack of a private area
- Concern over dress/appearance
- Busy doing other things
- Unfamiliarity with video visits

## Digital Divide

- Tech literacy
- Lack of adequate internet access
- Lack of hardware

# Digital Divide

# Ongoing Video Visit Improvement Project

## Patient:

- 3<sup>rd</sup> party vendor for phone support with pts to enroll in MyChart and get them ready for video visits.
- Push/Pull workflows, multiple touch points
- Advertise the pros of video visits over telephone visits
- Work with county on initiatives to bridge the digital divide

## Technology:

- Future EPIC development – video visits w/o need for an active MyChart account. E-mail or SMS direct link to video visit
- Potentially switch to native EPIC/Twilio in the near future

## Provider/Staff:

- Educational campaign, virtual brown bag sessions, targeted interventions, hardware assessments
- Help assess which visits are best for F2F, Video or Telephone

# Growing Patient Portal (myHealth Online) Use & Support

**TOTAL INCOMING  
CALLS: 8,260**

**TOTAL OUTGOING  
CALLS: 2,780**

**% OF PATIENTS  
ACCEPTING HELP: 60%**

# Advancing Telehealth

**PROVIDER IPADS  
DEPLOYED: 550**

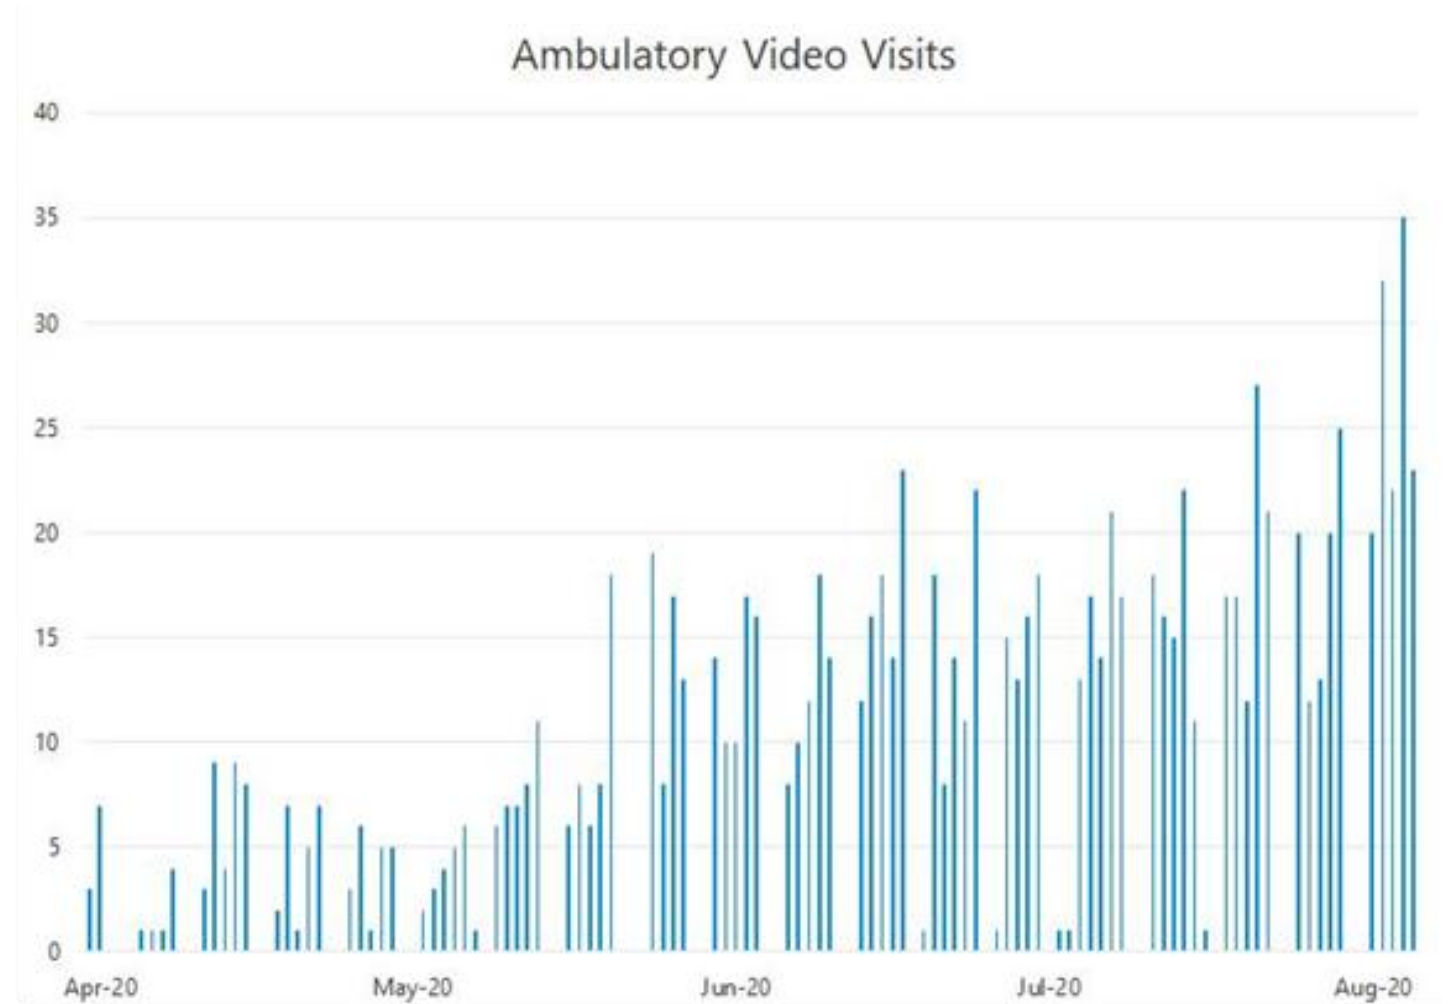

**PROVIDER IPHONES  
DEPLOYED: 450**

**TOTAL OUTPATIENT  
VIDEO VISITS: 850**

**TOTAL DEPARTMENTS  
WITH ACCESS: 200**

# SNI Link

## SNI Link/Data Driven Organizations/EHR User Groups

<https://safetynetinstitute.org/membersupport/datadrivenorganizations/ehr-user-groups/>

ABOUT SNI WHAT WE DO MEMBER SUPPORT PUBLICATIONS CONTACT

### EHR USER GROUPS

HOME » MEMBER SUPPORT » DATA DRIVEN ORGANIZATIONS » EHR USER GROUPS

#### About EHR User Groups

In 2019 and 2020, SNI is hosting peer learning sessions for reporting, analytics or clinical operations leads to hear from systems well-established on Epic and Cerner how they are addressing technical and operational practices and lessons learned.

#### Epic Safety Net User Group (eSNUG)

##### 2020 Schedule

WebEx information and slides will be sent the day before the meeting. All materials will be saved on SNI Link.

A list of proposed topics and dates/times for 2020 meetings are below.

#### MEMBER SUPPORT

- » Value-Based Strategies
- » Ambulatory Care Redesign
- » Data Driven Organizations
- » Global Payment Program Support
- » PRIME Support
- » Whole Person Care Support
- » Waiver Integration Teams
- » SNI Link

Date To be rescheduled as  
needed

Topic (Tentative as of 1/9/20)

Presenter

Tuesday 2/18, 1-2

Predictive Models

Santa Clara tentative
