Webinar: Improving Patient Portal Utilization

Lessons from Riverside University Health System (RUHS)

May 27th 12pm. [Register here.](#)

- Strategies to increase patient portal utilization across clinics and departments, which notably led to a **jump in patient portal activation from 25% to 70%** within their pediatric clinic.
- Topics: promoting culture change at the clinic level, standardizing workflows across clinics, maximizing portal value, and more.
- On the webinar, SNI will release **a set of proven processes and tools to guide patient portal deployment efforts**

DRR: Allowable Gap

- Due to HEDIS proprietary rules related to publication of their Digital specifications, The summary description of DRR in the PY₄ Reporting Manual does not specify the Allowable Gap details.
- The DRR human readable and machine-readable logic sections of the digital specs states one gap of up to 45 days is allowed during the measurement period (i.e., CY2021).
- No gaps in enrollment are allowed from May 1 of the year prior to the Measurement Period through December 31 of the year prior to the Measurement Period
