11:10am

Hybrid Vigor!

- We had 3 physician leaders pilot this
- Feedback was overwhelmingly positive e.g. **“pretty much my dream template”**
 - Providers reported staying more punctual throughout the clinic *and* finished on time
 - Nurses were also enthusiastic about this model because clinic stayed on time
 - Telehealth access is distributed throughout the week rather than limited to a single half day
 - Unfilled telehealth slots open up for in person visits 48 hours ahead of the appointment time

Impact on ACCESS?

Third Next Available Median Days Wait: Telehealth vs. Non-Telehealth

Is THE HYBRID TEMPLATE MORE EFFICIENT?

We measured timeliness of clinic end time:

Ex. Last AM patient checked out at 11:55am means clinic finished 5 minutes early

On average, we are seeing that providers:

- finished ~5 minutes early with standard template**
- finish ~8 minutes early with hybrid template**

Percent of Video, audio, & In person visits remained FAIRLY steady

I.T. CONSIDERATIONS

I.T. had a lot of work leading up to this

- installed USB webcams and headsets in all exam rooms
- tested network bandwidth to anticipate high volume of simultaneous video visits
- some clinics have phones in the exam rooms and we're aiming to do this for all clinics
- We are working on a solution re what to do when a patient needs to reach their provider for a TH visit e.g. they missed the call*

CHALLENGES ETC.

- A few providers are arriving to clinic late. Some have called patients while driving into work.
- A few providers note a brief lull between the second telehealth patient and the first office visit.
- There's been no significant change in our patient rating of provider (former QIP metric).
- We have payment parity for the foreseeable future in CA

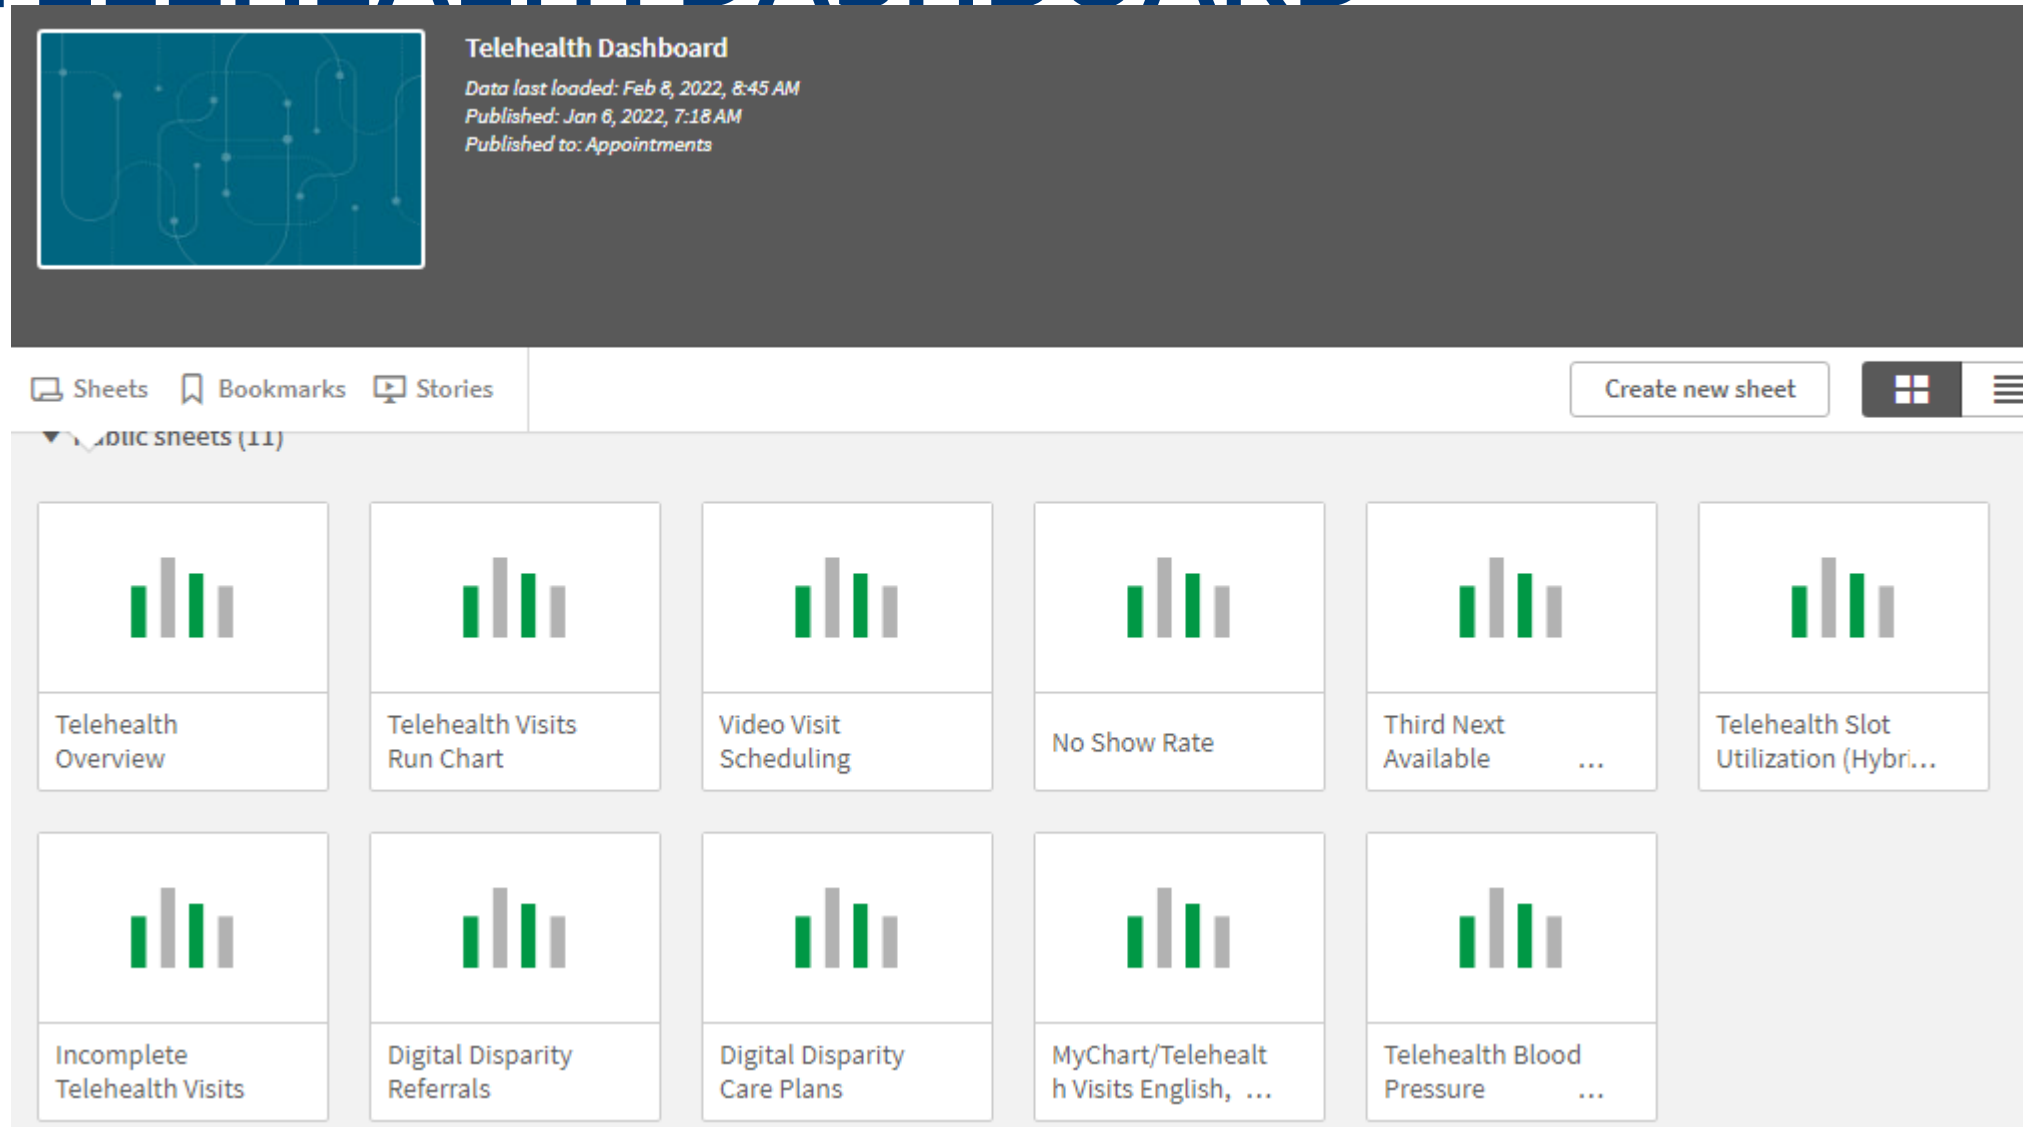

Questions?

TELEHEALTH DASHBOARD

Referrals, Care plans, MyChart

Average 60 referrals & 30 care plans per month completed to address digital disparities!

Percent of Empaneled Patients who have MyChart activated
Comparing July 2020 → February 2022 (+ percent relative increase)

- English 41% → 75% (+83%)
- Vietnamese 32% → 63% (+97%)
- Spanish 15% → 45% (+200%)

Virtual Care Zoom Clinics: West County Health Centers

West County Health Centers

Caring for our Communities

a california *healthi*.center

West County Health Centers

- *3 Primary Care sites*
- *1 Dental*
- *Teen Clinic*
- *Third Street House*

- *EHR: eClinicalWorks*

- *Gender specialty services, Wellness Services including but not limited to: OMT, Acupuncture, Herbal Consults, HeartMath, Ayurveda consults, Nutrition Consults, and Group medical visits*

Data and Types of Telehealth

- *Current State (Feb 2022)*
 - *34.4% In-Person Visits*
 - *30.5% Phone Visits*
 - *35.1% Video Visits*
- *Used Modality structured data to capture video vs phone vs in-person*
- *Telehealth Hybrid*
 - *Provider is remote, patient comes into office depending on reason for visit.*
 - *Patient does not have device or internet to conduct a video visit*

Current Data thru Dec. 26th

All Visits:

Telehealth Modality Totals and Average by Week

Historical Data

All Visits:

Telehealth Modality Totals and Average by Week

The Challenge

- How to mimic in-person clinic using Zoom's 'breakout room' feature.
- Key Objectives:
 - Ensure HIPAA Compliance
 - Utilize an existing employee/role for the “waiting Room Concierge” role
 - Maintain Care Team communication and collaboration
 - Good relational care

What We Tried

- eClinicalWorks Tele-visit feature
 - Issues connecting for both staff and patients
- Doximity
 - Only provider to patient
- Individual Zoom License's
 - Behavioral Health Visits (current for majority of BH Providers)
 - Use's zoom waiting room feature
- Clinic Based Zoom License's
 - Every Provider scheduled under that facility for remote visits
 - Started to included BH Provider at one site
 - Utilizing the zoom “waiting room feature”

What Happened

What Worked

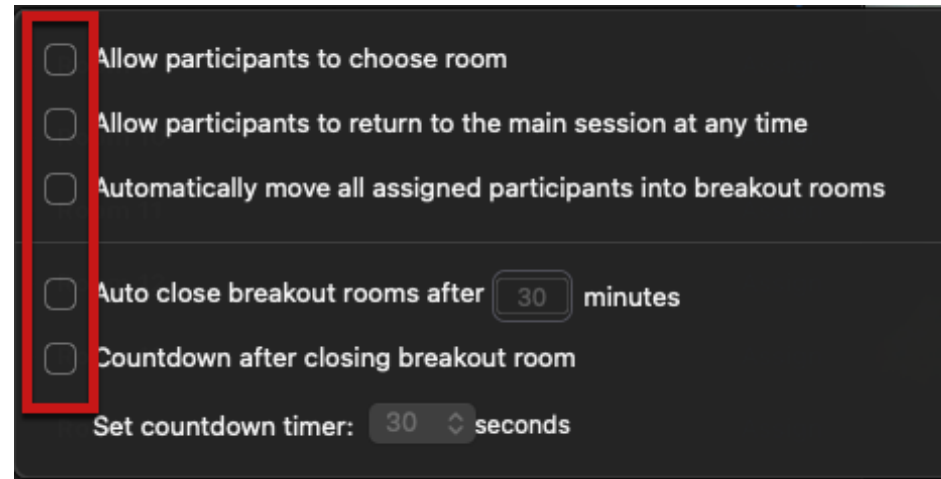

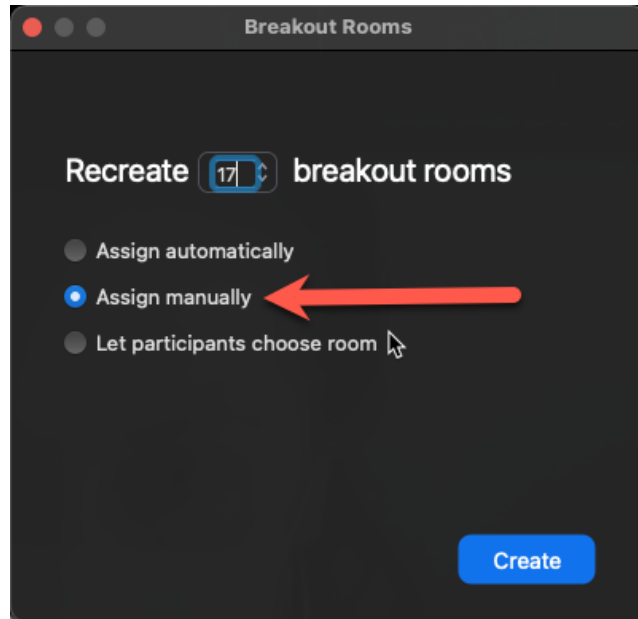

- Zoom Pro license per Primary Care sites
 - Whole Care Team joins is given co-host rights and remains on Zoom while the Provider see's patients
 - Provider/MA have majority interactions with patients, but other staff are on and ready if the need arises
 - Reception role took on managing the zoom “waiting room”
- If telehealth visit, booked as a video visit, with the understanding we would fallback to a phone visit if needed
- Offering of additional IT Equipment
 - Monitor (for dual setup) and headsets

Lessons Learned: Breakout Room Settings

WCHC Standard settings checked daily

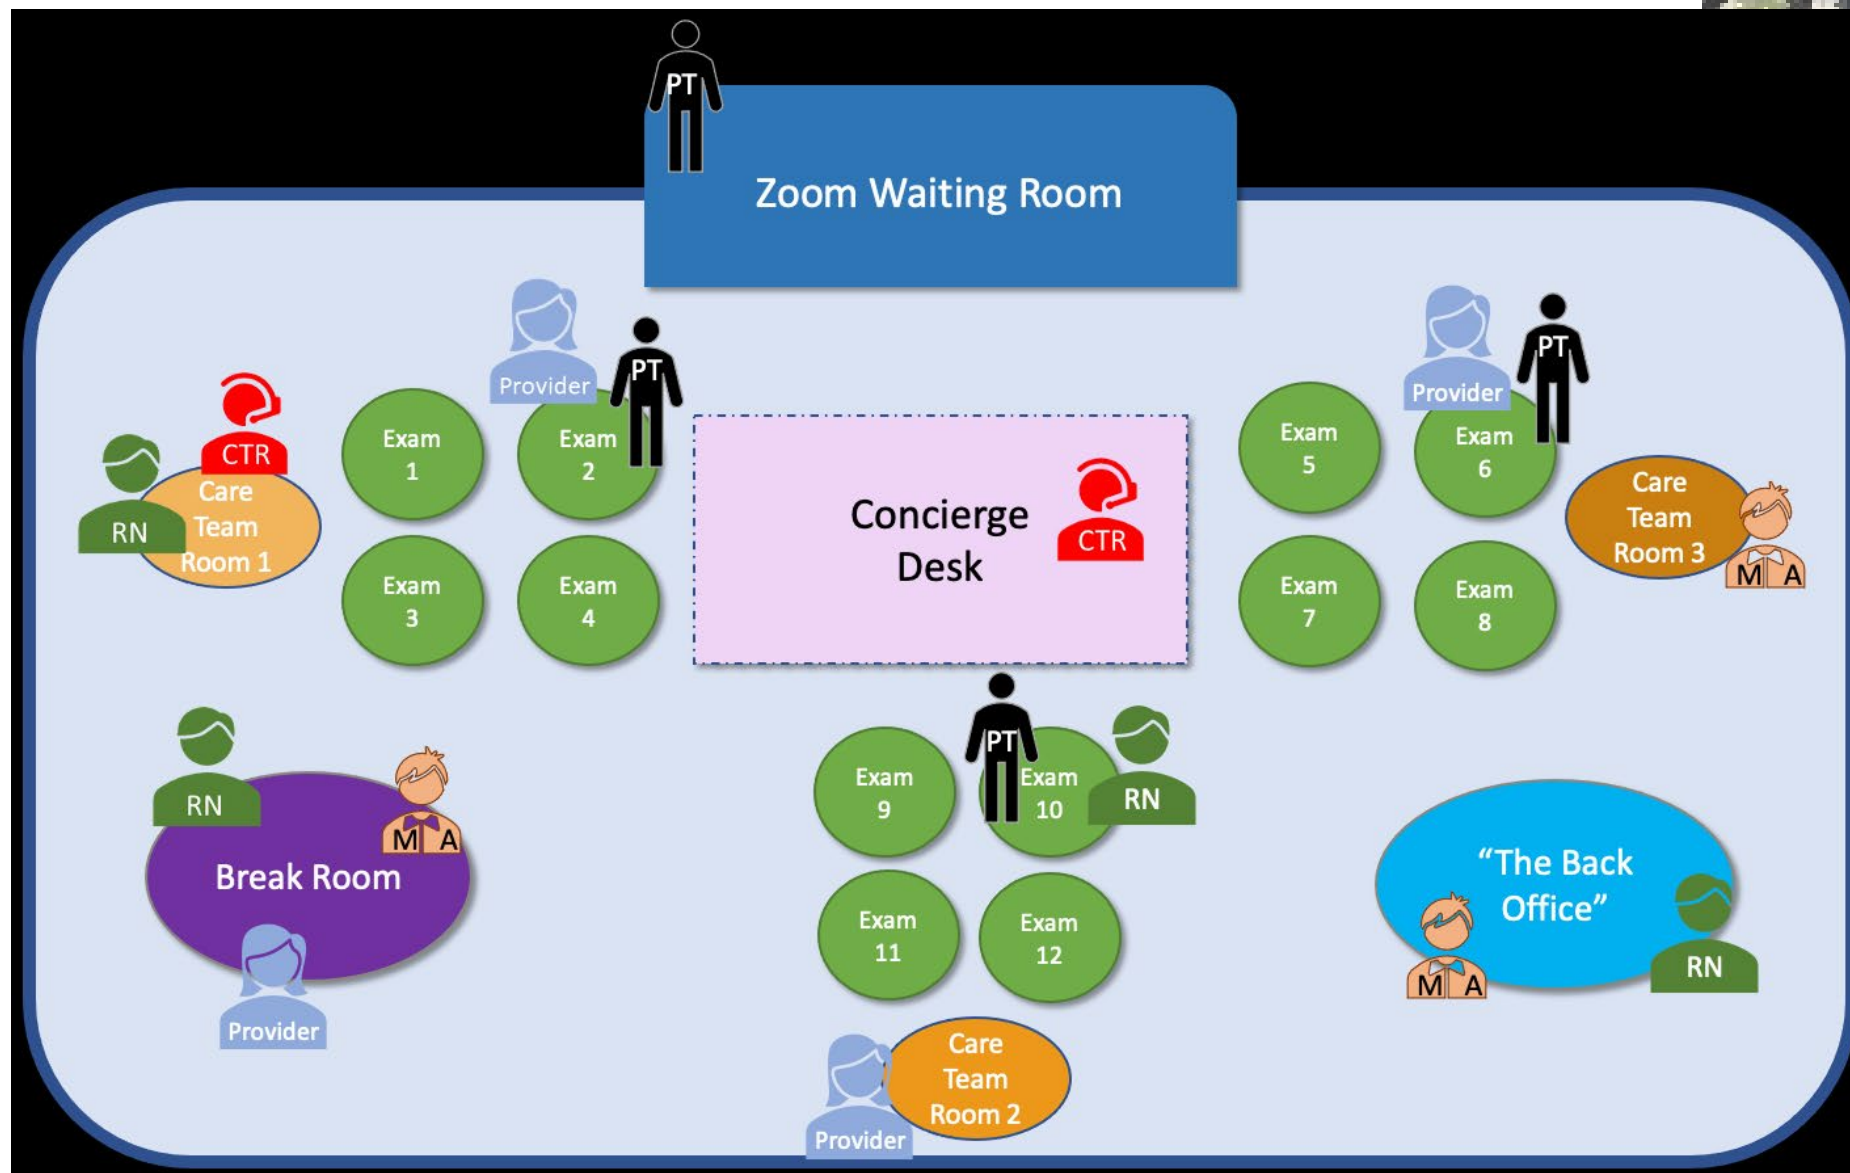

A Zoom update auto checked the setting that allowed patients to exit their Exam Breakout room, back to the Main session. Now the Host creating the breakout rooms daily, check these settings. Number of rooms depends on how many providers are on that day.

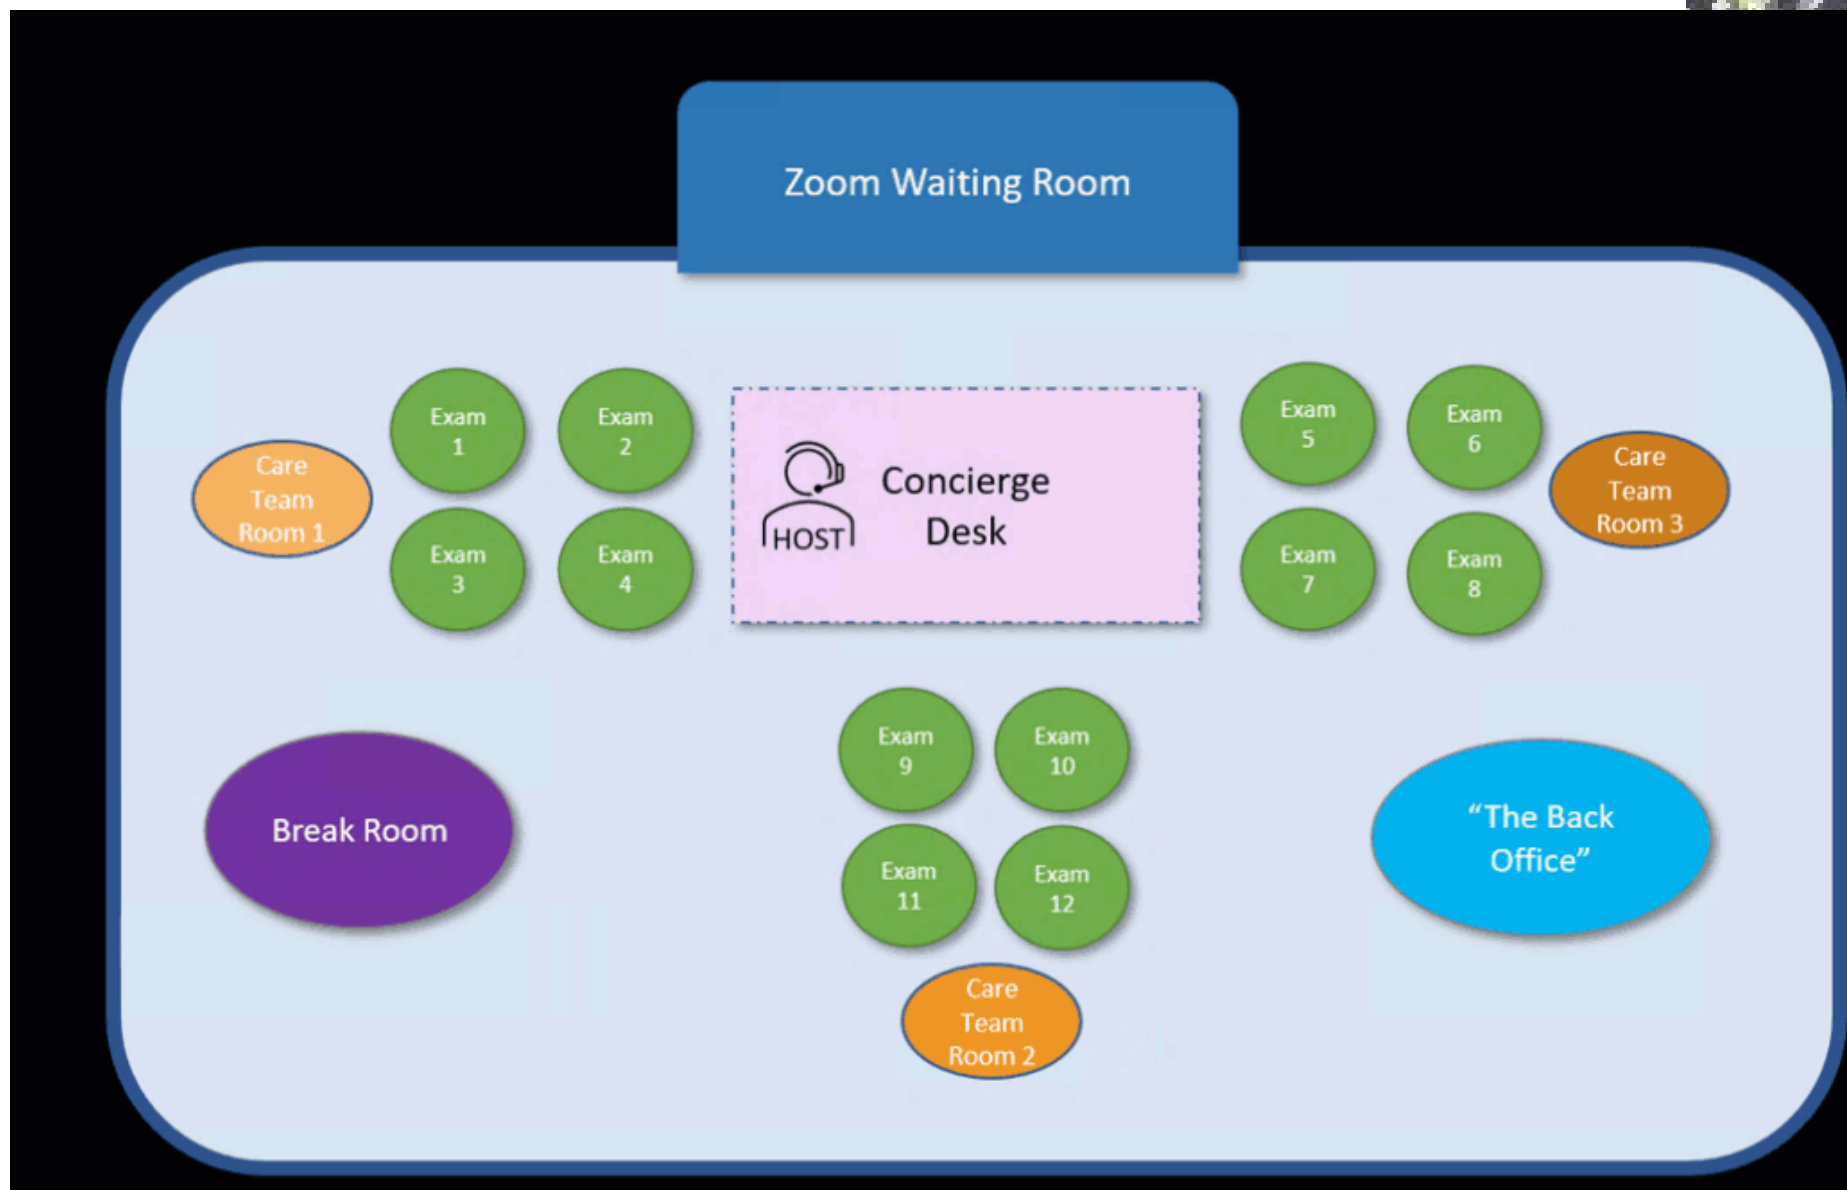

Zoom Clinic:

Zoom Clinic:

What Happened

Challenges And How We Addressed Them

- Reception role hesitancy/pushback using new IT platform
 - Remote elbow support, using Teams share screen, and being a “Jiminy cricket” in the user's ear
- IT Support
 - Had IT Volunteer for limited time
 - Focused on improving website page, and including link in the appt confirmation text, and training clinical support roles
- Patient technical barriers/Reason for visit needs patient to come into office
 - All sites have at least one exam room with iPad setup for patient to come in and conduct video visit with remote provider
 - MA's will room take vitals and/or urine as needed

Lessons Learned

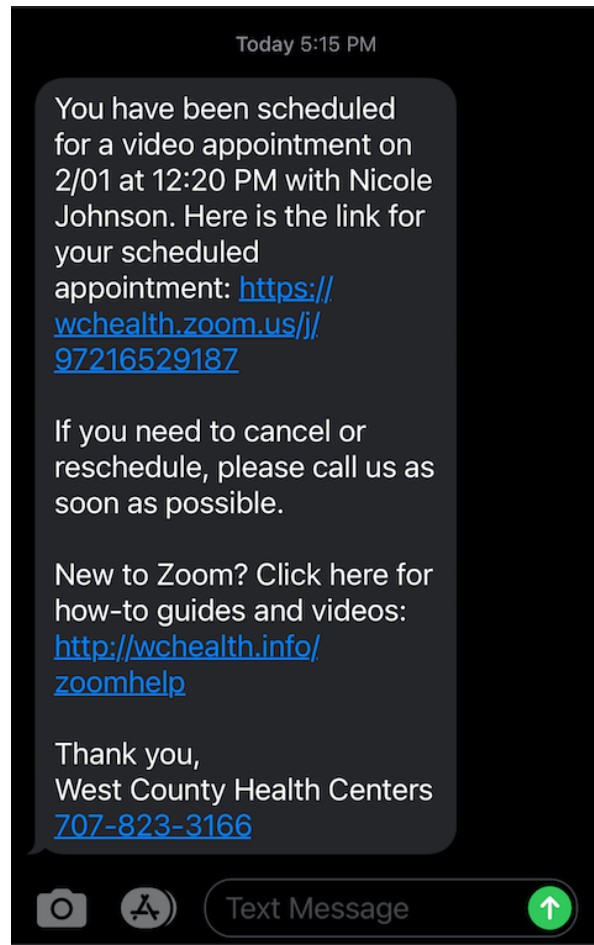

- Phased approach worked well for us
 - Training Care Team by Care Team, focusing on care teams for one site at a time
 - IT Staff vetted the lift of Hosting, to see if new role was needed/recommended
- Staff hesitancy can be overcome with enough training and support
- Wireless headsets were provided for Reception staff who are also checking in the in-person appointments
- All staff need to be marked as Co-Hosts
- Zoom settings, to ensure HIPAA compliance
 - Uncheck “allow participants to leave breakout room and return to main room
 - Disable chat feature - the history remains

West County Health Centers is excited to invite you to our Virtual Zoom Clinics!

We know how hard it is getting around these days. The hassle and the risks – we reserve those excursions for the necessities and try to keep them to a minimum. However in our caution, we lose something. A human connection...

You're a Patient of West County Health Centers because of first and foremost we see you as a member of our community, as a human not just a number. Come make a connection with us.

We are relaunching our video visits on a familiar, stable, and easy to use system – we are thrilled to bring you West County Virtual Clinics Powered by Zoom. Using Zoom allows us to recreate the physical clinic environment online with an easy check-in process and dedicated virtual spaces for you and your care team.

How to Prepare your Virtual Zoom Visit.

Preparing for your virtual visit only requires that you download Zoom on the device you plan on having the device. We've prepared written instructions

For help Installing Zoom on your PC/MAC

The web browser client will download automatically when you start or join your first Zoom meeting, and is also available for manual download [here](#).

For help Installing Zoom on your iPhone/iPad

The iPhone/iPad Zoom application is available on the App Store. If you are viewing this page on your iPhone/iPad right now, click the link below to be brought to the download page. A Video demonstrating how to download the application can be found [here](#).

For help Installing Zoom on your Android device.

The Android application is available on the Play Store. If you are viewing this page on your Android device right now, click the link below to be brought to the download page.

A short instructional document on how to download Zoom on either Android or iOS devices can be found [here](#).

How to join your Virtual Zoom Visit.

You will be provided with a link to join your Virtual Zoom Clinic via SMS/Text Message or through your Patient Portal/Healow® App at the time you make the appointment. At the appointment time, simply click the link to be instantly connected to the clinic.
