#	CHANGE TESTED	PERSON RESPONSIBLE	APRIL		MAY				JUNE				JULY				
			23	30	7	14	21	28	4	11	18	25	2	9	16	23	30
1	Set and document self-management goals together with the patient	Sue Johnson	We plan to gather tools that have been used successfully at other health centers and refine them for our use. Then we will test them with Dr. H's patients and then expand to Dr. P's patients. After that we will incorporate a review process.														
a.	Adapt as necessary, tools for self-management, which includes action plan, identification of personal barriers, confidence level, and f/u plan.	Sue Johnson	→														
b.	Test SM tool internally	Sue, Dr. Hanson	→														
c.	Pilot of tool with patients	Sue, Dr. Hanson	→ (1 patient, Dr. H) → (all pts, one day, Dr. H) → all pts of Dr. H X review and revise use on all pts														
d.	Review goals with patient as part of follow-up	Sue, Dr. Hanson	(1 pt) → Dr. H pts → f/u with all patients →														
2.	Use group visits to support self-management	Dr. Hanson	We know of two centers that have been successful with group visits as a way to get patients more involved in their own care. We will "borrow" their process, adapt and test it with Dr. P's patients.														
a.	Adapt group visit procedures from two other CHC's	Dr. Peters, Jo, Sue	dev "our" process														
b.	Test group visit		2 pts of Dr. P--- 10 pts of Dr. P --- (Dr. H) - Dr. P
